

Domaine Curtet

Savoie Rouge Frisson des Cimes

ABOUT THE ESTATE

- These vineyards were tended for many years by the trailblazing Jacques Maillet, who passed them on to Florian and Marie Curtet after a long apprenticeship.
- Converted to organic agriculture in the early 2000s, these wines are now made according to the principles of biodynamics.
- Florian and Marie are true iconoclasts, encouraging biodiversity throughout their estate, even planting trees in the middle of the vineyards.
- Their approach to winemaking is completely non-interventionist in the cellar, and production is intentionally kept to only 2000-2500 cases per year.
- The Curtets follow their own path, prioritizing ideals over commerce. Their convictions shine through in every bottle.

APPELLATION

Vin de France

GRAPE VARIETY

Gamay, Mondeuse, Pinot Noir

FARMING

Biodynamic, Certified Organic

SOIL

Molasse, a sandy-loamy soil of marine origin

VINEYARDS & VITICULTURE
